

Contents

Preface	ii
Message from the Program Committee Chair <i>Shmuel Katz (Technion—Israel Institute of Technology)</i>	iii
Fundamentals of Concern Manipulation <i>Harold Ossher—IBM T.J. Watson Research Center, USA</i>	1
Requirement Enforcement by Transformation Automata <i>Douglas R. Smith—Kestrel Institute, USA</i>	5
Typing For a Minimal Aspect Language: Preliminary Report <i>Peter Hui—DePaul University, USA</i> <i>James Riely—DePaul University, USA</i>	15
Towards a Type System for Detecting Never-Matching Pointcut Compositions <i>Tomoyuki Aotani—University of Tokyo, Japan</i> <i>Hidehiko Masuhara—University of Tokyo, Japan</i>	23
On the relation of aspects and monads <i>Christian Hofer—Darmstadt University of Technology, Germany</i> <i>Klaus Ostermann—Darmstadt University of Technology, Germany</i>	27
On bytecode slicing and AspectJ interferences <i>Antonio Castaldo D’Ursi—Politecnico di Milano, Italy</i> <i>Luca Cavallaro—Politecnico di Milano, Italy</i> <i>Mattia Monga—Politecnico di Milano, Italy</i>	35
Specializing Continuations: A Model for Dynamic Join Points <i>Christopher J. Dutchyn—University of Saskatchewan, Canada</i>	45
Aspects and Modular Reasoning in Nonmonotonic Logic <i>Klaus Ostermann—Darmstadt University of Technology, Germany</i>	59
Aspect-Oriented Programming with Type Classes <i>Martin Sulzmann—National University of Singapore, Singapore</i> <i>Meng Wang—National University of Singapore, Singapore</i>	65
