Course Objective and Topics

Pen-Based User Interfaces is a course designed to give students a thorough understanding of the latest techniques, algorithms, and evaluation methodologies used in designing and developing pen-, sketch-, touch-, and gesturally-based user interfaces. In addition to reading and presenting research papers, students will write several programs to reinforce concepts discussed in class and will produce a final project of their choice.

General Topics include:

- 1. Introduction and History of Pen- and Sketch-computing
- 2. C#, Visual Studio, and Windows Presentation Foundation
- 3. Ink Preprocessing
- 4. Gestural User Interfaces
- 5. Ink Segmentation
- 6. Classification Algorithms for Recognizing Ink
- 7. 2D Parsing
- 8. Sketch and Multi-touch based Interfaces
- 9. Evaluation Methodologies

Syllabus

Week 1

August 22, 2016 - Lecture - Introduction to Pen-based UIs

- -- go over course mechanics -- discuss the history pen computing
- -- present some challenges with pen computing
- -- present various applications

Readings

Sutherland, I. SketchPad: A Man-Machine Graphical Communication System, Proceedings of AFIPS Spring Joint Computer Conference, 329-346, 1963.

Herot, C. Graphical Input Through Machine Recognition of Sketches, Proceedings of SIGGRAPH'76, 97-102, 1976.

August 24, 2016 - Talk about final projects Papers discussion

Week 2

August, 29, 2016 – Lecture - Visual Studio, C#, Tablet PC SDK

August 31, 2016 - Lecture - Windows Presentation Foundation

Readings

Nathan, A. WPF 4.5 Unleashed, Sams, 2013.

Week 3

September 5, 2016 - Holiday - No Class **Assignment 1 Out**

September 7, 2016 - Lecture - Ink Preprocessing & Simple Features

- -- data representation
- -- filtering
- -- transformation invariance
- -- dehooking, cusps, and self intersections

Readings

Week 4

September 12, 2016 - Papers discussion

September 14, 2016 – Lecture - Gestural User Interfaces

- -- in computer graphics/modeling
- -- gesture structure 1 or multi-stroke
- -- gesture invocation buttons & button placement
- -- gesture learning existing notations, tutorial, embedding in GUIs
 - visual (pre & post) feedback
- -- FSAs
- -- punctuated gestures

Assignment 1 due Assignment 2 out

Collaboration Policy

Students must do their own work but are encouraged to collaborate with others in the form of discussion of concepts and implementation details pertaining to Visual Studio, C#, and Windows Presentation Foundation. For final projects, teams of up to two students are encouraged.

Assignments

Paper Presentations – Students will have to present 1-2 papers of their choice, outside of the assigned readings and give a 25 minute presentation on it.

Guided Discussion – During the paper discussion sections, students will lead the discussion on a particular paper that was assigned in class.

Programming Assignments

- 1. Intro Students will replicate Windows Journal to get them acclimated to Visual Studio, C#, Windows Presentation Foundation, and pen and multi-touch input. This application will also be a test bed for the other assignments in the course.
- 2. 2D SKETCH Students will develop a 2D shape recognition program to create and manipulate circles, rectangles, squares, and triangles. Students will explore how to best combine pen and multi-touch input for the various operations needed. The focus of the assignment will be on heuristic gesture recognition.
- 3. Math Symbol Recognizer (Research Contest) Students will compare Anthony and Wobbock's \$N symbol recognizer with a modified version of Taranta et al.'s Penny Pincher algorithm coupled with stochastic resampling to increase the amount of usable training data.
- 4. Pen Calculator Using the math symbol recognizer created in assignment 3, students develop a pen-based calculator that will recognize and evaluate mathematical expressions. Students will use both pen and multi-touch input for different parts of this assignment.

5. Final Project

Students will do a final project of their choice that explores a particular concept in pen-, sketch-, or multi-touchbased user interfaces. They must first write a short proposal and get it approved by the professor.

Tentative Grading Scheme:

	0	
Assignment 1	10%	
Assignment 2	10%	
Assignment 3	10%	
Assignment 4	10%	
Paper discussions		5%
Paper presentations		5%
Final Project		50%

The instructor reserves the right to use plus/minus grading in this course.
