

3D User Interface System Control Techniques

Lecture #11: System Control

Spring 2014

Joseph J. LaViola Jr.

Spring 2014

Universal 3D Interaction Tasks

- Navigation
 - Travel – motor component
 - Wayfinding – cognitive component
- Selection
- Manipulation
- System control
- Symbolic input

Spring 2014

System Control

- Often considered glue of 3D UI
- Specify the “what”
- Commands are issued to
 - request system to perform a particular function
 - change interaction mode
 - change system state

Spring 2014

Human Factors and System Control

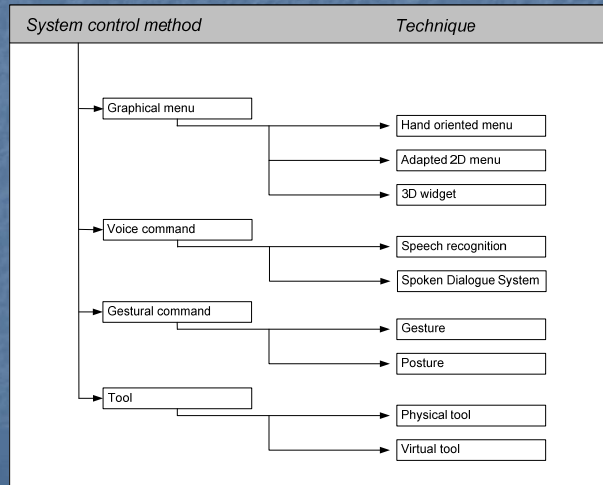

- Learn from mechanical systems
 - transfer of mechanical energy/information to system
 - control-body linkage
 - interaction between control device and human body
- Effectiveness of control-body linkage
 - human experience, training
 - shape and size of control
 - visual representation and labeling
 - methods of selection

Graphical Menus – Design

- Placement
 - world-referenced (freely in world)
 - object-referenced (centered to object in world)
 - head-referenced (view centered)
 - body-referenced
 - device-centered
- Selection
 - Degrees of freedom, constraints
- Representation and structure
 - form, size, space, affordance
 - hierarchy: functional and semantic grouping, context sensitivity, control coding

Voice Commands

- Speech recognition
- Spoken dialogue techniques
- Requires
 - speech recognition engine
 - speaker dependent vs. independent
 - varying vocabulary size
 - good microphone
- Invisible to the user
- Push to talk

Spring 2014

Gestural Commands

- One of the first system control techniques
- Posture – static hand configuration
- Gesture – dynamic movement

Spring 2014

CAP6121 – 3D User Interfaces for Games and Virtual Reality

©Joseph J. LaViola Jr.

Gesture Command Types

- Speech connected
- Mimic gestures
- Symbolic
- Sign language

Spring 2014

Tools

- Provide directness of interaction
- Familiar (real-world devices)
- Physical tools
 - real physical objects (props)
 - may have graphical representation
- Virtual tools

Multimodal System Control

- More than one input modality (speech, gesture, facial expression, etc...)
- Advantages
 - decoupling
 - flexibility and complementary behavior
 - control of mental resources
