**READINGS:**

*Text:* Bowman, D., Kruijff, E., LaViola, J., and Poupyrev, I. *3D User Interfaces: Theory and Practice*, Addison Wesley, July 2004.

Creighton, Ryan H. *Unity 4.x Game Development by Example*, Second Edition, Packt Publishing, 2013.

*Papers:* student/professor selected research papers

**Catalog Description:** 3D user interaction, spatial user interfaces, selection and manipulation, 3D navigation, system control, evaluation methodologies, augmented and mixed reality, input and output hardware

**Course Objectives:** 3D User Interfaces for Games and Virtual Reality is a course designed to give students a rigorous introduction to the design, implementation, and evaluation of the fundamental techniques in spatial 3D interaction.

**Student Requirements:**

1. Star Wars Game -- Students will create a lightsaber game where they control the saber with and use the force using the Microsoft Kinect 2.
2. Fruit Ninja -- Students will create a Fruit Ninja game where they will travel through a maze and fend off attacking fruit using the using the Microsoft Kinect 2.
3. Survey paper -- Students will write a paper on a 3D UI topic of their choice, focusing on summarizing and aggregating work done in the last decade.
4. Paper Presentations -- Students will have to present at least one paper on a topic in 3DUIs.
5. Final Project -- Students will do a final project of their choice that explores a particular concept in 3D user interfaces, augmented reality, or virtual reality. They must first write a short proposal and get it approved by the professor.

**Tentative Grading Scheme:**

Assignment 1	15%
Assignment 2	15%
Survey Paper	15%
Paper presentations	5%
Final Project	50%

The instructor reserves the right to use plus/minus grading in this course.
