Games and 3D User Interfaces: Past, Present, and Future

Lecture #2: Games and 3DUI* Spring 2024 Joseph J. LaViola Jr.

*Special thanks to Ivan Poupyrev

Spring 2024

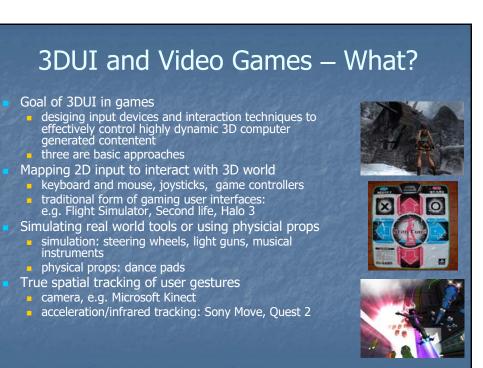

3DUI and Video Games – Why?

- Video games
 - multi-billion dollar industry: \$98 billion in 2018 in US
 - major driving force in home entertainment: average gamer today is 33 years old advanced 3D graphics in HOME rather then universities or movies studios
- Driving force in technological innovation
 - graphics algorithms and hardware, sound, AI, etc.
 - technological transfer to healthcare, biomedical research defence, education (example: Folding@Home)
- Recent innovations in 3D user interfaces
 - graphics is not enough anymore
 - complex spatial, 3D user interfaces are coming to home (example: Quest 2 controllers)
- Why 3D user interfaces for games?
 - natural motion and gestures
 - reduce complexity
 - more immersive and engaging
- Research in 3D UI for games is exciting
 - will transfer 3DUI to other practical applications, e.g. education and medicine

Spring 2024

CAP6121 – 3D User Interfaces for Games and Virtual Reality

Lecture Outline

CAP6121 - 3D User Interfaces for Games and Virtual Reality

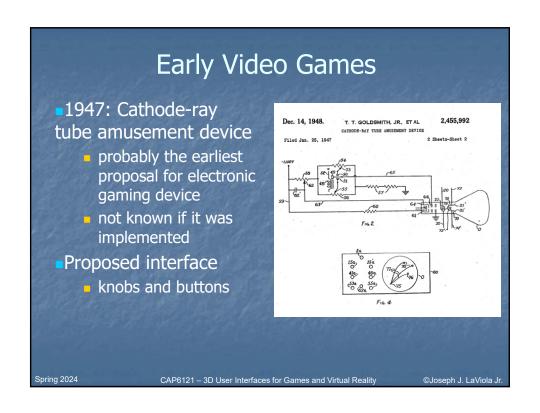

- Historical Perspectives
 - early consoles
 - arcades
 - early 3D/VR game interfaces
- Recent Trends in 3DUI in the home
 - new generation of game UI
- The Future of UI in games
 - AR/VR/mobile games
 - working towards the future
- Conclusions

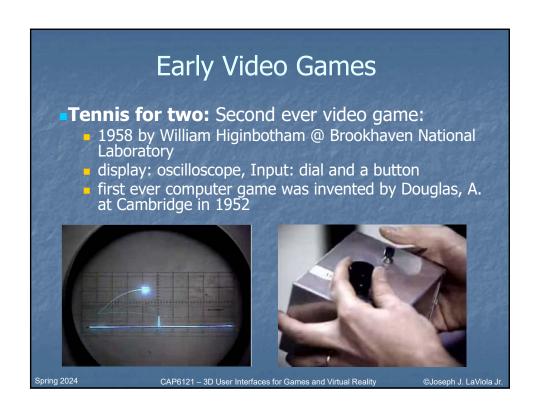

Spring 2024

CAP6121 – 3D User Interfaces for Games and Virtual Reality

Historical Notes on Game UIs Spring 2024 CAP6121 – 3D User Interfaces for Games and Virtual Reality ©Joseph J. LaViola Jr.

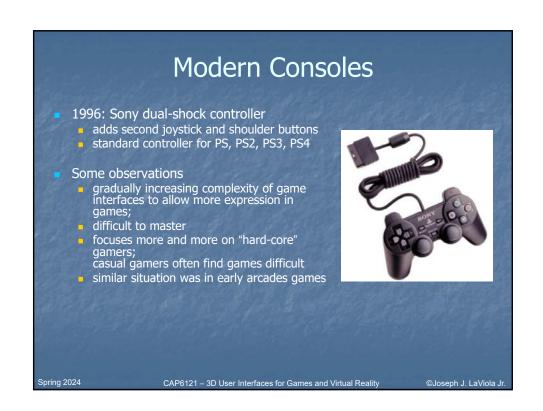

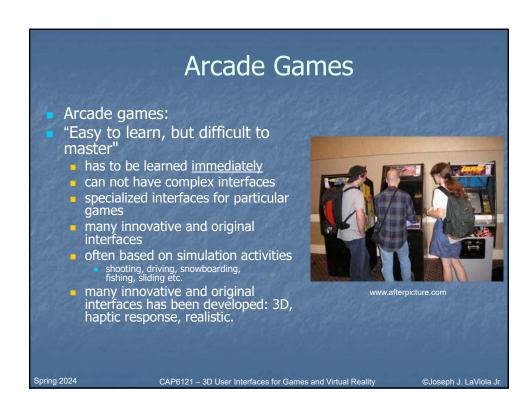

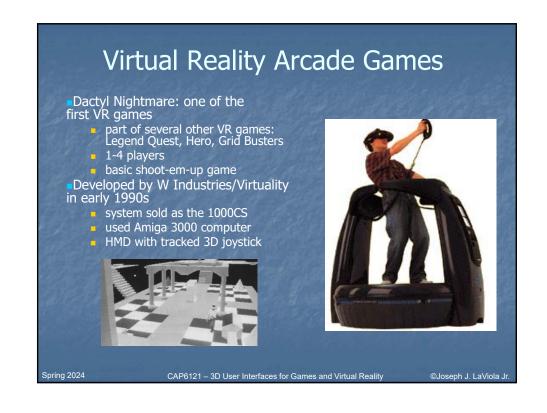

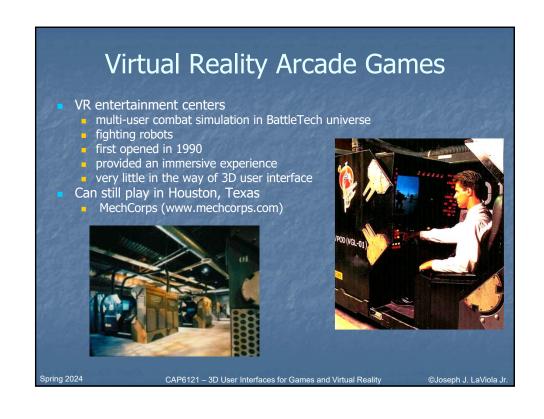

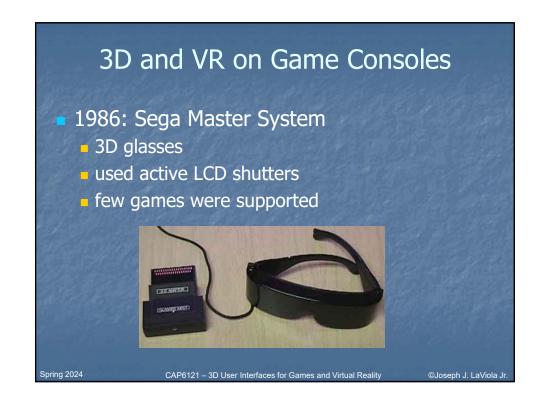

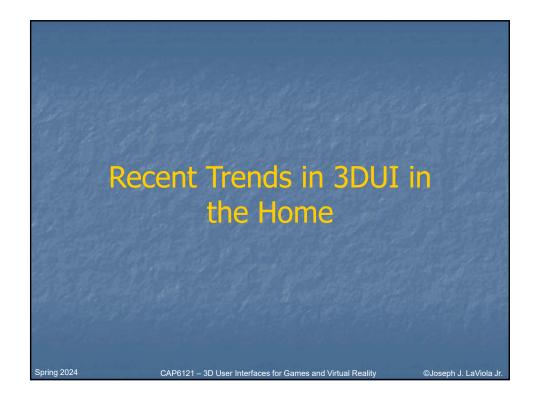

3DUI in the Home Today

- Revival and rapid growth of 3D spatial interfaces for games today
 - cheaper and higher quality of sensors
 - fast game hardware can perform complex tracking/recognition
 - need for simpler and more intuitive interaction with games
 - games has become mainstream culture, more casual not only hard-core gamers
- The first 3D UIs in people hands
 - often based on previous research results and ideas
 - simplified for price

Spring 2024

3DUI in the Home

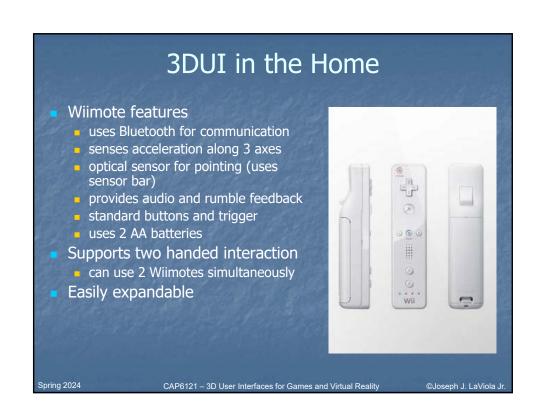

- 2003: Sony PS2 Eye Toy
 - video camera interface for PS2
 - casual/party games
 - significant success in Europe/US
 - based on several decades of research on visual tracking in robotics and computer vision
 - developed by Richard Marks

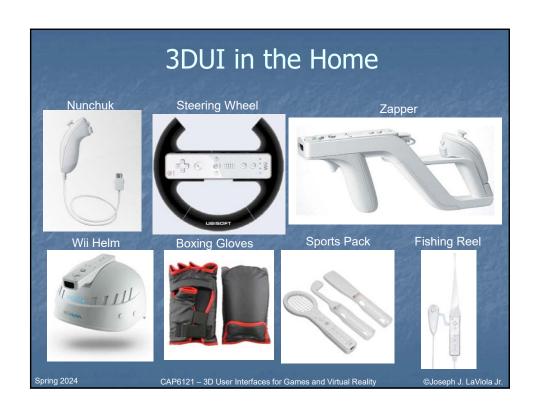

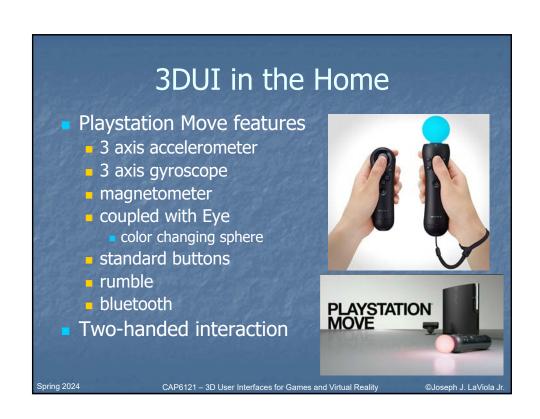

Spring 2024

CAP6121 – 3D User Interfaces for Games and Virtual Reality

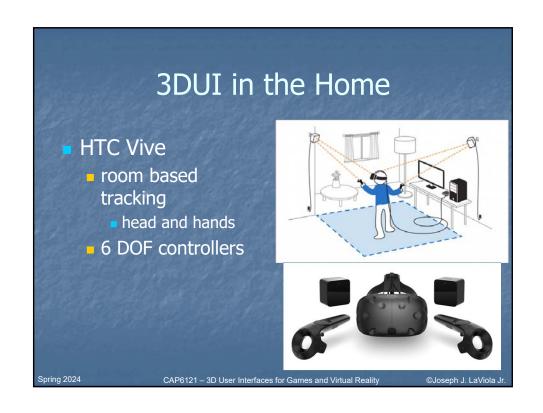

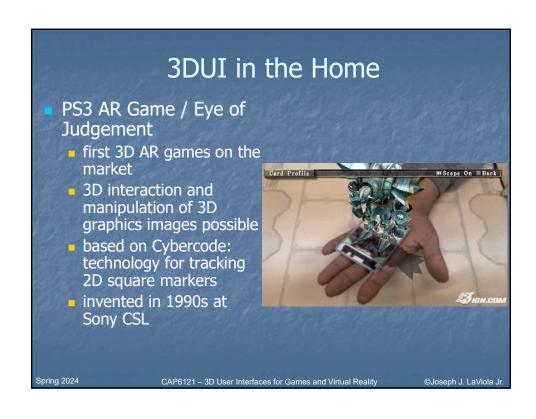

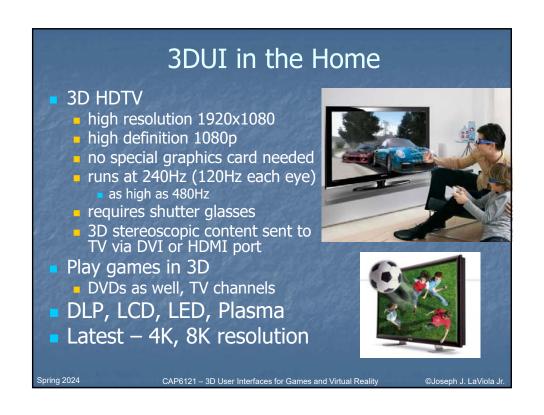

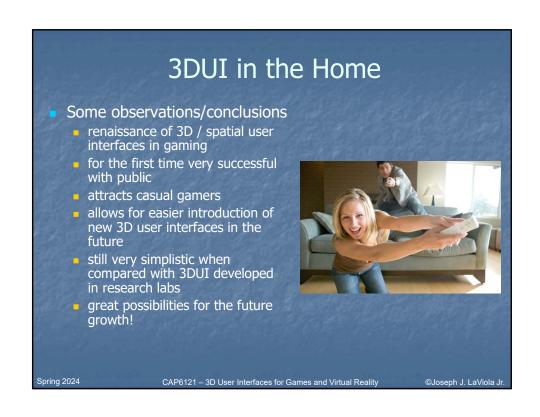

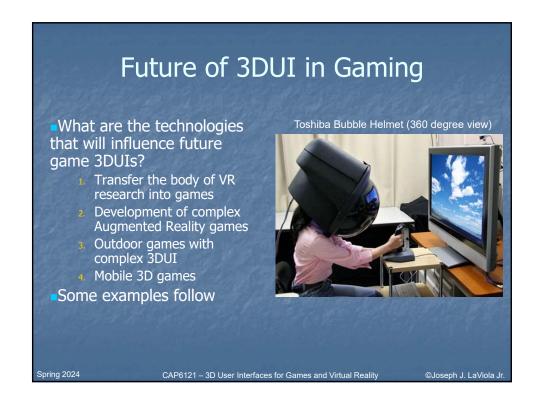

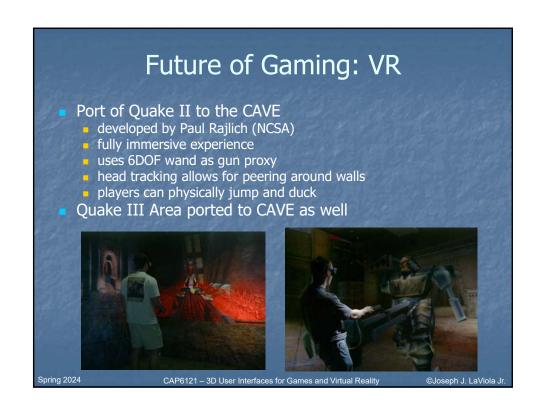

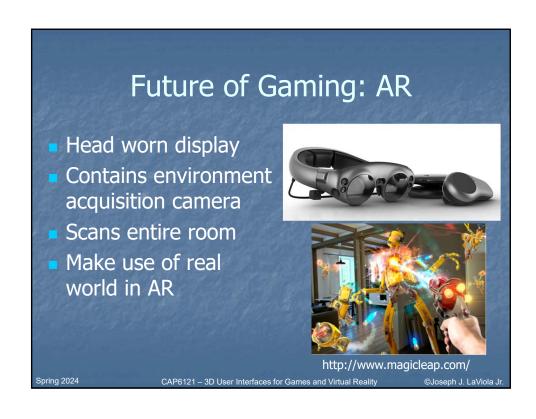

Future of Gaming: Outdoor Games

- •AR Quake where monsters are superimposed into real world (i.e., Quake in the physical world)
 - developed by Thomas,
 Piekarski et al. in 2000 (South Australia)
 - can walk around in both indoor and outdoor environments
 - equipment is somewhat cumbersome
 - getting smaller and cheaper

Spring 2024

Future of Gaming: Mobile Games

- Today mobile gaming platforms
 - PSP and Nintendo 3DS
 - interaction is still mostly 2D
- Future mobile platform
 - true 3D spatial interaction
 - does make use of inertial sensors
 - location-based interaction
 - AR tracking and interaction

Spring 2024

CAP6121 – 3D User Interfaces for Games and Virtual Reality

Moving Towards the Future of 3DUI and Games Body of knowledge on 3D user interfaces interaction technique interaction metaphors and styles input devices usability studies

provide more realistic experiences

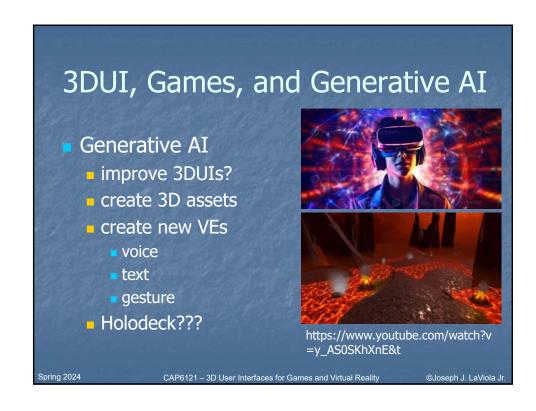

reduce interaction complexity

exercise!!!

Spring 2024

CAP6121 – 3D User Interfaces for Games and Virtual Reality

Want to transfer to the video game domain

Conclusions

- 3D UI for games is important and interesting research area
- Its real and possible to create new user interface culture
- Transfer to other areas of everyday human activity
- You can start developing 3D game user interfaces yourself

Spring 2024

CAP6121 – 3D User Interfaces for Games and Virtual Reality

Next Class

- The Video Game Motion controller and you
- Readings
 - LaViola and Marks' SIGGRAPH 2010 course notes
 - Unity 5.x Cookbook (Smith, M., Queiroz. C.)
