### Course Objective:

This course will expose you to the world of internet applications. We'll deal with XHTML coding, including the use of images, sound, and animation. Advanced page design using CSS will also be covered in the course.

**Text:** The text *Web 101 – Third Edition*, Wendy Lehnert and Richard Kopec, 2008, Pearson (Addison-Wesley), ISBN: 0-321-42467-0 is in the bookstore, **but we will not use this text book.** Instead, online notes will be used for the course lecture material.

### Grading:

Three exams will be given, two regular exams and a final exam (comprehensive). Exams are given once – be there as there are no dropped test scores. There will be four or five related projects plus some assignments. Assignment and project submission guidelines will be given later. The assignments and projects are to be individual efforts.

|  |     |
