University of Central Florida

Web Site Project – Phase 3

- For the final part of the website project, I'd like you to add a form to one of the pages of your website. It can either appear on an existing page, or you can create a special page just for the form.
- The form should ask the visitor for basic information and you should use regular expressions in a PHP script to validate at least two fields that the user will supply.
- The action of your form should be to send you an email extracting the values from the form and including them in the email. See the lecture notes on forms for the technique.
- This will be the only addition to the website beyond what you already have in Phase 2.

Complete Assignment Requirements Checklist

Requirement	Completed	
	Yes	No
At least one page embeds an audio player/file		
At least one page should include a JavaScript script		
All files and images uploaded to Eustis (or some server) and site is working properly when viewed by a visitor.		
Upload 1 XHTML document to WebCourses (only one document is needed).		
A XHTML form is included on one page.		
At least two of the fields of the form are validated using a regular expression		

NOTE: There is also a single page version of this checklist on the course website (under the assignment) that might be more convenient to use. Its there in both .doc and .pdf formats.

What To Turn In

WebCourses: (by 11:55pm Monday May 2, 2011)

1. Upload 1 of your XHTML documents (10 pts)
2. Send me a comment indicating the complete URL to your website (10 pts).

Eustis Server: (by 11:55 pm Monday May 2, 2011)

1. Upload all XHTML documents (50 pts).
2. Upload all CSS documents (40 pts).
3. Upload all of your image files. (20 pts).
4. Upload all of your audio/video files (20 pts).
