## Computer Science I - Summer 2011

Recitation \#6: Stack Applications - Infix/Postfix (Solutions)

Convert the following INFIX expressions into POSTFIX expressions using stacks (as shown in class). Show the contents of the stack at the indicated points ( $A, B$, and $C$ ) in the infix expression.

NOTE: There is a SPECIFIC way that these conversion problems are tested. The TA will do problem 1 for you and show you what is expected of you and what you can expect on a test.

You should keep a "WORKING" stack that you use to solve the problem. Then you will copy the contents of this working stack, when appropriate, into the given stacks (stacks A, B, and C).

1) $44-15 /\left(9-3^{\mathrm{A}} * 2\right)+12$

B

C

Resulting POSTFIX expression: 4415932 * - / - 12 + Answer: 51
2) $12 *(8-7+1)^{\mathrm{B}}-(4+6) / 2$

B

C

Resulting POSTFIX expression: 1287 - 1 + * 46 + 2 / Answer: 19
3) $\left(3+8+5^{A}-10\right)^{B} / 3+4+5-7$

|  |
| :---: |
|  |
| + |
| $($ |
| $\mathbf{A}$ |

Resulting POSTFIX expression: $38+5+10-3 / 4+5+7$ Answer: 4

A B C
4) $14-(6-10)-10$

A

B

C

Resulting POSTFIX expression: 14610 - - 10 Answer: 8
5) $16-\left(8+\left(10^{A}-7+3\right) * 2^{B}-10\right) /\left((4-2) * 3^{C}-1\right)$

|  |
| :---: |
| $($ |
| + |
| $($ |
| - |
| A |

B

Resulting POSTFIX expression:
168107 - 3 + 2 * + 10 - $42-3$ * 1 - / -
Answer: 14
