

list

```
fruits = []  
fruits.append("apple")
```

```
fruits = ["apple", "banana", "strawberry"]  
          0         1         2
```

How to access

(1) Index 0 to length of list - 1.

```
fruits[1] → "banana"
```

How do I get the length of a list?
len(fruits)

```
fruits = ["apple", "banana", "strawberry"]  
          -3         -2         -1
```

BOXES

```
boxes = [ [10, 20, 5],  
          [5, 15, 25],  
          [6, 8, 4],  
          [3, 9, 12] ]
```

box len=10
width=20
height=5

```
boxes[0]  
boxes[2][1]
```
