① Hand back quizzes

② Wordle

③ Advice for future

1- Dictionary of words } read from a file  
(I made from his dictionary)

↳ Set has a set of distinct objects

We can add an object quickly + look up if an object is in the set quickly. (Much better than a list for this purpose)

|     |     |              |              |              |                        |
|-----|-----|--------------|--------------|--------------|------------------------|
| p   | i   | a            | t            | e            | SOL                    |
| ↙   | ↙   | <del>✗</del> | <del>✗</del> | <del>✗</del> |                        |
| [s] | [t] | [a]          | [r]          | [e]          | guess                  |
| ✓   | ✓   | G            | N            | G            | Green easy             |
| N   | Y   |              |              |              | $sol[i] \neq guess[i]$ |
