SI Intro Programming
Homework Assignment: Collecting Coins

Arup and his daughter Anya collect the state quarters. All of these quarters were minted from 1999 – 2008. Furthermore, for the purposes of this problem, any quarter with a date in that range is a state quarter.

Arup and Anya have collected several quarters. Write a program to count how many of them are state quarters that they can add to their collection!

Please use a continue statement in your implementation, since the purpose of this assignment is to practice the continue statement.

Sample 1: Input and Output
```
How many quarters have you collected?
8
What is the date of quarter 1?
1979
What is the date of quarter 2?
