

SI@UCF Intro Programming

Homework Assignment: Donation Drive

For this program, you are simulating a donation drive.

First, take input for the user's donation goal.

The program will then continue to ask for donations until that goal has been reached.

At the end, it will display the total amount donated and the number of donations it took to reach that goal.

Sample 1: Input and Output

What is your donation goal?

100

How much do you want to give?

34

How much do you want to give?

23

How much do you want to give?

14

How much do you want to give?

15

How much do you want to give?

10

How much do you want to give?

9

You got 105, reaching your goal in 6 donations!
