

BHCSI Intro Programming Homework Assignment: Military Time

In this program you will ask the user how many seconds past midnight it is, and given that information, you will print out the current time in a military format (where the hours go from 0 to 23).

Sample Program Runs

(Note: Computer output is in plain text while the user's input is in bold for these examples.)

How many seconds past midnight is it?

125

The current time is 0 hours, 2 minutes and 5 seconds.

How many seconds past midnight is it?

11000

The current time is 3 hours, 3 minutes and 20 seconds.

Note: Keep in mind that the user could enter a number of seconds greater than the number of seconds in a day. In ALL cases, your output should never "exceed" 23 hours, 59 minutes and 59 seconds.
