

COP 2930 - Individual Programming Assignment #1

Due date: Please consult WebCourses for your due date/time

Objectives

1. To make sure ALL students have a working version of IDLE on their own personal laptop or computer.
2. To give students practice at typing in, compiling and running simple programs.

Problem A: Hello World (hello.py)

Write a single line Python program that prints out a greeting of your choice to the screen.

Directions for Submission

You must either show Arup or Alec that you have downloaded IDLE onto a personal computer/laptop/tablet. Primarily, this will be done via screen share on Zoom during office hours. You may also show Arup at the very end of class on your designated day. When you should Arup and Alec, please go through the act of starting IDLE. Then, open up your source file hello.py and run the file. Accordingly, Arup or Alec will enter full credit for Program #1.

Note: All other programs will be submitted via Webcourses as one or more .py file attachments.
