

Spring 2020 COP 2930 Pair Program #2 Grading Criteria

Criteria for Choice A

Style Points: 5 pts total - Header comment with both names (1 pt)

Good variable names (1 pt)

Good use of white space (1 pt)

Function Comments - explaining formal parameters (1 pt)

All Internal Comments (1 pt)

Complexity: 5 pts total - Judge relative to other flags, in order to get full credit, there should be different types of shapes in the overall design, different shading etc.

Functions: 10 pts total - 2 pts per function - 1 pt if the function performs a reasonable repeatable task, 1 pt if the formal parameters and return value (if any) are a reasonable design and the function does what it says

Incidentals: 5 pts - these are floating points for any issues that may arise due to the open nature of the assignment.

Criteria for Choice B

Style Points: 5 pts total - Header comment with both names (1 pt)

Good variable names (1 pt)

Good use of white space (1 pt)

Function Comments - explaining formal parameters (1 pt)

All Internal Comments (1 pt)

Functions: 5 pts total - Give full credit if the breakdown of functions is reasonable, give partial credit for high level issues with function design.

Execution Points - 15 pts - 3 pts for each type of game (1 pt for giving the right questions, 1 pt for appropriately handling responses, 1 pt for a correct summary of a round), 3 pts for handling quitting (1 pt for actually quitting, 2 pts for printing the appropriate statistics)
