Projects Deliverables

1. Project proposal. This document should outline your proposed project, including task and timelines, and should identify several specific resources that you will use (for example, references to conference or journals papers, addresses for Web sites, etc.). Clearly identify the project participants in your proposal. Your project may change direction over the course of the semester. This proposal should be about five pages long.

2. Final project report. This should be between 40 and 50 pages long, depending on the project and group size.

3. Oral presentation. At the end of the semester, we will have a mini-conference to discuss the projects. Each project will have 15 to 20 minutes to make a presentation, with 5 minutes for questions afterward.
