CAP 6671: Class Presentations

Dr. Gita Sukthankar
gitars@eecs.ucf.edu

Part of being an effective researcher is learning how to present your research to to other people. To practice this skill, you will be presenting a paper to the class during the second half of the semester.

- Select a paper that has been written in the past 5 years that has appeared in an AI/robotics conference or journal

- Paper should be between 6-20 pages in length and relate to the themes of this class.

- Presentation should be 15 minutes long.

- Remote students will have the option of presenting to me over audio link.

- Paper should be approved at least 1 week before presenting.

- When presenting the paper, pretend to be the author of the paper delivering it at a conference rather than leading a discussion group; if you talk about the strengths and weaknesses of the paper save it for the Conclusion slide.

- Presentations should be completed between Feb 24th and Apr 19th.

This assignment will be graded on a 9 pt scale, based on:

- Clarity of spoken presentation

- Quality of your presentation slides

- Your understanding of the paper and ability to answer questions
