

Instructions for installing JDK1.5.0\_08 (Java 5.0)  
And setting up JCreator

JDK1.5.0

1. Go to <http://java.sun.com/javase/>
2. On the top, go to “Downloads” -> “Java SE”
3. Click download next to “JDK 5.0 Update 8”
4. Accept the license agreement (if you dare)
5. Select platform (“Windows Offline Installation”)
6. Run downloaded file, and follow all default options

JCreator

1. Download and install JCreator 3.50 (freeware) from [jcreator.com](http://jcreator.com)
2. run JCreator
3. go to “configure” -> “options”
4. click “JDK profiles” and use the up/down buttons to make sure “JDK version 1.5.0\_...” is at the top. If “JDK 1.5.0...” is **not** listed:
  - click the “new” button
  - jdk 1.5.0 should be in “C:\Program Files\Java\jdk1.5.0\_08”  
(if not, do a search on your computer for jdk1.5.0 -> if not there, then you did not install JDK1.5.0 correctly)

You're ready to go!
