① Finish up Shoe/ShoeInventory

② Posted Examples, Highlighting

- Method overloading
- Details of parameter passing
- Types of variables allowed in instance method (instance variables, formal parameters, local variables)
- Mutable vs immutable objects
- Visibility modifiers
- Scope

A shoe collection object "HAS-A" shoe object.
Typical program design has a hierarchy of HAS-A relationships

IF I DID

myshoes.removeAtIndex(2); // I would lose these shoes forever!

Visibility Modifiers

private - visible in class

protected - visible in class AND in classes that inherit from it

public - visible anywhere
