

COP 3502 11/17/25-

Foundation Exam Info Day

My recent observations

2 apps UCF students wrote to help students studying for the exam. There are positives to these apps, but since their wide spread use, ~~so~~ scores have come down a bit. (CORRELATION)

My guess

Students try to memorize molds of solutions to problems w/o understanding exactly what they are doing.

The mindset of trying to understand how each statement/object works + high level problem solving techniques will allow you to do well on all types of questions.

* LOTS OF VALUE IN WRITING CODE
COMPILING, DEBUGGING + TESTING.
