24	factor, 246–247	Uniform rational quantization,	Wide gamut color space, 83	24
25	– Ward histogram adjustment,	Schlick, 273–276		25
26	266–272	$V(\lambda)$ (vee-lambda) curve,	XYZ	26
27	Tone reproduction/operators,	25–26	– color-matching function,	27
28	gradient domain, 345	Viper FilmStream camera,	30–31	28
29	– Fattal compression,	160–161	– color space, 34	29
30	352–357	Virtual reality, 88	– converting to RGB, 34–35	30
31	– Horn lightness computation,	Visible differences predictor	– scaling, 46	31
32	231, 346–352	(VDP), 102		32
33	– performance, 358, 360–362	Visual adaptation	Yee segmentation, 316–323	33
34	Tone reproduction/operators,	– dynamics of, 219–221		34
35	local, 223, 277			35
