RE: UCF UX Lab

To Whom It May Concern:

Over the past twelve months Building Optimization Systems Technology Inc. (BOS Tech) has worked extensively with the UCF industry-focused User Experience (iUX) Academy. During this time our company was able to move from a concept to a working Minimal Viable Product (MVP) with paying clients. This would not have been possible without our partnership with Dr. Pamela Wisniewski and the iUXA.

Utilizing the wide range of skill sets of the iUXA students and Pam's extensive knowledge of interface design, our product has routinely exceeded our clients expectations. Because our competition includes many large legacy companies, one of our largest value adds are the ease of use and intuitive design our of dashboard, which is the portion of BOS Tech's suite of solutions that our clients interact with.

Having been born and raise in Central Florida I take great pride in working with local talent. Working with the UX lab for the past twelve months has been a true blessing which BOS Tech intends to continue for many months/years to come.

Sincerely John Lepak

President Building Optimization Systems Technology Inc.
