

## Fall 2019 - Distinguished Speaker Series “Blockchains and Distributed Computing”

Thursday - November 14, 2019

Research I - 101 A/B

10:30 a.m. - 12:00 p.m.

**Abstract:** There has been a surge of interest in blockchain-based distributed ledger systems such as Bitcoin, Ethereum, and others. Much of this work originated outside the distributed computing community, but the questions raised, such as consensus, replication, fault-tolerance, privacy, and security, and so on, are all issues familiar to "classical" distributed computing. This talk will survey the theory and practice of blockchain-based distributed systems from the point of view of classical distributed computing, along with reckless speculation about promising future research directions. This talk is intended for a general audience.

***Dr. Maurice Herlihy***

**NAE, ACM, NAI, NAAS Fellow**

***An Wang Professor of Computer Science***

***Brown University***

**Bio:** Maurice Herlihy has an A.B. in Mathematics from Harvard University, and a Ph.D. in Computer Science from M.I.T. He has served on the faculty of Carnegie Mellon University and the staff of DEC Cambridge Research Lab. He is the recipient of the 2003 Dijkstra Prize in Distributed Computing, the 2004 Gödel Prize in theoretical computer science, the 2008 ISCA influential paper award, the 2012 Edsger W. Dijkstra Prize, and the 2013 Wallace McDowell award. He received a 2012 Fulbright Distinguished Chair in the Natural Sciences and Engineering Lecturing Fellowship, and he is fellow of the ACM, a fellow of the National Academy of Inventors, the National Academy of Engineering, and the National Academy of Arts and Sciences.
